# Statistical Variables

- Data Dictionary for details
  - » Variable and Value labels, etc., in SPSS
  - » Statistical example of Metadata

The screenshot displays the SPSS Data Editor window for a file named \*HM.sav. The main window shows a variable dictionary table with columns for Name, Type, Width, Decimals, Label, Values, Missing, and Co. A dialog box titled 'Value Labels' is open in the foreground, showing a list of value labels for a variable. The list includes: 1 = "Head", 2 = "Wife or Husband", 3 = "Son or Daughter", 4 = "Son-in-Law or Daughter-in-Law", 5 = "Grand Child", 6 = "Parent", 7 = "Parent-in-Law", 8 = "Brother or Sister", 9 = "Other Relative", 10 = "Adopted/Foster/Step Child", 11 = "Not Related", and 98 = "Don't Know".

|    | Name     | Type    | Width | Decimals | Label                  | Values              | Missing | Co |
|----|----------|---------|-------|----------|------------------------|---------------------|---------|----|
| 1  | province | Numeric | 1     | 0        | PROVINCE               | {1, NWFP }...       | 9       | 8  |
| 2  | area     | Numeric | 1     | 0        | TYPE OF AREA           | {1, Major Urban}... | 9       | 8  |
| 3  | cluster  | Numeric | 3     | 0        | CLUSTER                | None                | 999     | 8  |
| 4  | h_no     | Numeric | 2     | 0        | HOUSEHOLD NUMB         | None                | 99      | 8  |
| 5  | l_no     | Numeric | 2     | 0        | Line Number            | None                | 99      | 8  |
| 6  | q03      | Numeric | 2     | 0        | Relationship to the He | {1, Head}...        | 99      | 8  |
| 7  | q04      | Numeric | 1     | 0        |                        |                     |         |    |
| 8  | q05      | Numeric | 1     | 0        |                        |                     |         |    |
| 9  | q06      | Numeric | 1     | 0        |                        |                     |         |    |

Relationship to the Head

|                                 |  |
|---------------------------------|--|
| 1 Head                          | Test if Field Q01 = Value 01   |
| 2 Wife or Husband               | Or if Field Q03 = Value 01   |
| 3 Son or Daughter               | And if Field Q03 # Field Q01   |
| 4 Son-in-Law or Daughter-in-Law | Error message is "E31:Q03,Q01: HoH should be line 01 " when test is True |
| 5 Grand Child                   |  |
| 6 Parent                        |  |
| 7 Parent-in-Law                 |  |
| 8 Brother or Sister             |  |
| 9 Other Relative                |  |

Record: 43 of 368

# Contrasts - Statistical Packages

- Strengths
  - » Statistical Methods
  - » Integration of Statistical meta-data
  - » Missing Value treatment
  - » Familiar terminology
- Weaknesses
  - » Handling multiple datasets, e.g. hierarchies
  - » Data editing - cases and variables
  - » Security and Auditing

# Contrasts - RDBMS

- Strengths
  - » Standardised data manipulation and linking
    - Integrated Null concept
  - » Standardised access from other systems, including Statistical Packages
  - » Integrated Programming, Security, Integrity, ...
  - » Rich Data Design Methodologies
- Weaknesses
  - » No statistical methods, limited aggregation functionality
  - » No statistical meta-data, missing value
    - Some functionality can be programmed, but not standard
  - » No treatment of macro data
    - Various extensions, but not standard

# Roles of RDBMS and Statistical Packages

- Don't choose between, use strengths of both
  - » RDBMS for data storage and management
  - » Statistical package for analysis and presentation
- Rich RDBMS concepts
  - » Useful way to think about all data
  - » Particularly valuable for complex situations
- Example of PFFPS
  - » Pakistan Fertility and Family Planning Survey
  - » Also used in Exercises
